Michael Gillett
Software Developer

(503) 616-8021   github.com/gillemic
michaelgillett19@gmail.com   https://www.michaelgillett.dev

SKILLS

Languages

Python, Javascript, C#, HTML/CSS

Technologies

Microsoft Office, Git, Netlify, NodeJS, React, Django, .NET Core, ASP.NET

EXPERIENCE

Office Temp, Aerotek   *Beaverton, OR*
OCTOBER 2019 - FEBRUARY 2020

Fulfilled general office duties such as: answering phones, customer service, opening and sorting mail, data entry using JDA inventory management and Microsoft Excel, and basic photo editing

Sugoi Sushi, Sushi Chef   *Corvallis, OR*
SEPTEMBER 2017 - MARCH 2019

Made sushi for 6-12 hours per shift while also maintaining a clean workspace, seating customers, answering questions, keeping a positive attitude, and training new employees

EDUCATION

Oregon State University - *Bachelor's Degree in Computer Science*
Graduated in June 2019 with a focus on Computer Systems. This degree included additional courses about many underlying computing technologies and their history, such as C and C++, processors, compilers, x86 Assembly language

PROJECTS

Tut-Tut, The Internet of Things (IoT) Rainfall Detector

Senior Project at Oregon State University. With three members in total, we built an internet-connected device that used a piezoelectric sensor wired to an Adafruit Feather M0 microcontroller (programmed in C) to detect the rate and intensity of falling rain.

Portfolio Website

Website written in ReactJS and hosted on AWS Amplify for personal use. Currently has a todo-list app, a page embedded with a resume, and a tetris game, with more projects on the way.

Tormar

Website also written in ReactJS using the Next.js framework for my dad's concrete business. A multi-page application containing company history, contact information, areas of service, and a gallery showcasing past projects.
